This attempt took 3 minutes.

Question 1

1 / 1 pts

I completed all of the learning activities assigned this week and posted my work to my GitHub Pages repository, if it was requested.

☒ True

☐ False

Question 2

1 / 1 pts

In your **base.css** file you have the following CSS rule:

```
span p {font-size: 1.5rem};
```

In the **larger.css** file you have the following rule:

```
@media only screen and (min-width: 32rem) {  
  span {font-size: 2rem};  
}
```

What will the font size be for paragraphs in span elements when rendered on a browser? (Select all that apply)

- ☒ On larger screens (32rem or larger) the font size will be 1.5rem.
- ☐ The font size will always be 2rem for paragraphs in span tags in all screen sizes.
- ☒ On smaller screens (less than 32rem) the font size will be 1.5rem.
- ☐ On larger screens (32rem or larger) the font size will be 2rem.

Question 3

1 / 1 pts

Which of the following statements about favorite icons are true? (Select all that apply)

- ☒ A favicon is displayed next to the page's title on the browser tab.
- ☒ There should be a link in the <head> of the document to the favicon location.
- ☒ A favicon is a small representation of the company logo and/or trademark.
- ☒ A favicon is displayed next to the page's name in the bookmark list.

Question 4

1 / 1 pts

If you have several child items and you want them to display in multiple rows and columns depending on the browser screen width you could display the parent tag as a flex item.

```
div.parent {display: flex;}
```

What additional CSS declaration would you need to add to the above rule to get the child items to display on multiple rows? (Select all that apply)

- ☒ flex-wrap: wrap;
- ☐ justify-content: multiple;
- ☐ warp: flex-wrap;
- ☐ flex-template-columns: auto;

Question 5

1 / 1 pts

If you are trying to have JavaScript add or remove a class of 'open' when a button is clicked, what would you need to complete this code block?

```
menubutton.addEventListener('click', () => {  
  
  menuitems..toggle('open', );  
  
});
```

Answer 1:

click

Answer 2:

classList

Answer 3:

open

Question 6

1 / 1 pts

What is the contrast ratio between these two colors?

- #0000ee
- #894

Use the **Contrast Ratio**  (<https://contrast-ratio.com/>) online tool to help you answer the question or another tool of your choice.

- ☐ Cannot be determined.
- ☐ .99
- ☒ 2.99
- ☐ 3.99
- ☐ 6.99

Question 7

1 / 1 pts

Which of the following best describes the purpose of a favicon?

- ☐ To enhance website security by encrypting sensitive data.
- ☐ To improve website accessibility for visually impaired users.

- ☒ To provide a visual representation of the website when bookmarked or added to the browser's favorites.
- ☐ To optimize website performance by caching frequently accessed resources.

Question 8

1 / 1 pts

Twitter (now known as X) has its own `<meta>` tags that are similar to the Open Graph protocol, but uses the "_____“ prefix instead of "og".

twitter

Question 9

1 / 1 pts

IDs can be used as many times as you need in an HTML page.

- ☐ True
- ☒ False

Question 10

1 / 1 pts

Which of the following scenarios best exemplifies the application of JSON in web development?

- ☐ Generating dynamic HTML content on the server-side using a templating engine.
- ☐ Encrypting sensitive user data before transmission over the network.
- ☐ Optimizing database queries for faster retrieval of large datasets.
- ☒ Storing and exchanging structured data between a client-side JavaScript application and a server using requests.

Question 11

1 / 1 pts

Which of the following are valid JSON key-value pairs? (Select all that apply)

- ☒ "age": 30
- ☒ "hobbies": ["reading", "traveling"]

- ☒ "address": { "city": "New York", "zipcode": "10001" }
- ☒ "isActive": null
- ☒ "name": "John"
- ☒ "isStudent": false

Question 12

1 / 1 pts

When using async/await, **error handling** can be done using _____ blocks within the async function.

- ☐ if/else
- ☒ try/catch
- ☐ promise/then
- ☐ defer/sync

Question 13

1 / 1 pts

Async functions in JavaScript always return a _____.

Promise

Question 14

1 / 1 pts

Which of the following statements best describes the purpose of the Fetch API in JavaScript?

- ☐ To store data locally in the browser's storage.
- ☐ To handle user interactions and events on a webpage.
- ☐ To modify the DOM structure of a webpage.
- ☒ To make network requests and retrieve resources asynchronously.

Question 15

1 / 1 pts

What does the Fetch API return when a network request is made?

- ☐ An array of objects containing the response data.
- ☐ A string containing the response data.
- ☒ A JavaScript Promise that resolves to a response object.
- ☐ A boolean indicating the success or failure of the request.
